

This technical drawing illustrates a mechanical component's design and manufacturing details. The top view shows a rectangular base with a central circular feature. The side view provides a cross-sectional look at the base and a central cavity. The bottom view shows the underside of the base with a row of holes and associated dimensions. Material specifications indicate 6061 Aluminum Alloy for the main body and a Clamp Plate for the base. A detailed table at the bottom right tracks various quality and process parameters.
